Results-driven Software Engineer who recently graduated from an intensive software engineering program as a frontend developer, eager to apply practical skills in a challenging and dynamic internship role. Proficient in HTML, CSS, JavaScript, Redux, and React. Passionate about creating user-friendly and visually appealing web applications.

PROJECTS

RentWave - RentWave is an application built with React to help landlords communicate with tenants and help tenants make rent payments.

E-commerce Website - Developed an e-commerce website using React and implemented product catalogs and shopping cart features. Utilized Redux for state management.

My Github Repos - Check out all my repositories on GitHub.
